Regional Momentum

Unifying partnerships for a collaborative approach to advocacy

As the Tulsa region continues to grow, the organizations and programs dedicated to the prosperity of our community continue to expand as well. With this in mind, the Tulsa Regional Chamber looks to lead advocacy efforts to create a unified, stronger voice for the Tulsa region and Northeast Oklahoma.

Since 2007, the OneVoice agenda has been the primary advocacy tool utilized by the Chamber and its partners to communicate top-priority issues to its state and federal lawmakers. Our successes in 2022 are a testament to what is possible through a unified vision:

- Significant investments in our state’s structurally-deficient highways and bridges
- 49 additional physician residency slots to train primary care physicians in Oklahoma
- $3.1 million for the OU Wexner TeleSvale Speciality Care Clinic
- $85 million for the OSU Medical Center
- Protecting funding for core services by successfully advocating against a dramatic reduction in the state’s personal income tax rate.

In preparation for 2013, more than 200 individuals representing various industries and geographic areas participated in taskforces to create a comprehensive list of key issues. This list was then prioritized by 320 participants at the Regional OneVoice Legislative Summit, resulting in the 2013 OneVoice agenda.

This year, 61 regional partners endorsed the OneVoice agenda. Top priorities include:

- State acceptance of Medicaid expansion
- Increased education funding
- Transformational workers’ compensation reform

These top-priority issues will allow the Tulsa region to continue on its forward path, enhancing business and growth to ensure Tulsans and residents of Northeast Oklahoma benefit from the best jobs, companies and commerce for our state.

Get involved with advocacy efforts by attending Regional Day at the Capitol April 17, or the Tulsa Regional Washington Fly-In April 23-25.

The Chamber is dedicated to encouraging the prosperity of the Tulsa region through advocacy and collaboration. With the Capitol luncheon series and Legislative Briefing Breakfasts. A calendar of these events can be found at TulsaChamber.com.
2013 oneVoice REGIONAL LEGISLATIVE AGENDA
Workers’ Compensation Reform
Support workers’ compensation reforms which will provide an efficient, cost-effective system that lowers costs and increases benefits, while providing quality health care to injured workers and ensuring a timely return to work. Such reforms will help lower workers’ compensation rates, reducing the cost of doing business in Oklahoma and leading to the creation and retention of vital jobs.

Quick Action Closing Fund
Increase funding for the Oklahoma Quick Action Closing Fund to a level that allows Oklahoma to be competitive with surrounding states. Greater funding in this economic development tool will assist in attracting high quality jobs and industry to the state, increasing the economic opportunity and quality of life for Oklahoma residents.

Physician Training
Support the expansion of OU and OSU medical school class size in Tulsa, additional Federally Qualified Health Center primary care residency training positions through the Teaching Health Center program, funding of the Oklahoma Rural Residency Program at $3 million and support of expanded loan repayment programs to incentivize physicians to locate in rural and underserved areas of Oklahoma through the Oklahoma Department of Transportation’s Eight-Year Plan.

State Personal Income Tax
Oppose efforts to reduce the state’s personal income tax rate that do not maintain revenue neutrality for core areas of state government, that include multi-year tax reduction formulas, or that shift the burden of generating or collecting future revenues onto Oklahoma’s businesses.

ODOT Eight-Year Plan
Support adding critical transportation projects to the Oklahoma Department of Transportation’s Eight-Year Plan, that are needed to promote economic development and preserve the safety and integrity of the Tulsa region’s transportation network. Of key importance are the following regional high priority projects: reconstruction of I-244; widening of I-44 east to the Will Rogers Turnpike expansion of U.S. 169 to six lanes north to State Highway 20; construction of a four-lane Port Road on Highway 266 from U.S. 169 to the Port of Catoosa; and the implementation of high-priority transit corridors.

Graduate Medical Education Funding
Support continued funding for Graduate Medical Education to ensure continuation and growth of residency programs in Oklahoma and support and leverage new and existing public funding for expansion of community based primary care residency programs through establishment of Teaching Health Center at Oklahoma PQHCs in collaboration with Oklahoma existing medical schools and academic medical centers.

Arkansas River
Support efforts to expedite the implementation of the Arkansas River Corridor Project for river infrastructure improvements. Allow federal match credit be accrued for state and local expenditures in order to advance construction activity while preserving the Tulsa region’s access to future federal funding for this federally-authorized project.

Marketplace Fairness Act
Support fair and equal treatment of local businesses through passage of the Main Street/Marketplace Fairness Act, allowing collection of sales tax from online sales and preventing the further erosion of our local merchants’ competitiveness. Without this Act, Oklahoma retailers will continue to operate at a competitive disadvantage versus out-of-state online retailers who refuse to collect sales taxes on sales made within Oklahoma.

McClellan-Kerr Arkansas River Navigation System
Support necessary Congressional appropriations to dredge the McClellan-Kerr Arkansas River Navigation System from 9 feet to its Congressionally-authorized 12 feet as originally intended; and to cover the System’s approximate $95 million in critical maintenance backlog.

Federal Rulemaking Authority
Support the reauthorization of the Workforce Investment Act, maintain the program’s employer-driven focus. Other priorities for the reauthorization include increased funding for demand-driven training; increased flexibility for local Workforce Investment Boards to set local targets for individuals served; expansion of funding opportunities for on-the-job training (OJT); funding for employer outreach regarding services; and greater flexibility to provide training to up-skill incumbent workers.

Tobacco settlement endowment Trust funding sources.

Graduate medical education Funding
Support necessary Congressional appropriations to the McClellan-Kerr Arkansas River Navigation System for river infrastructure improvements. Allow federal match credit be accrued for state and local expenditures in order to advance construction activity while preserving the Tulsa region’s access to future federal funding for this federally-authorized project.

Federal Rulemaking Authority
Support the reauthorization of the Workforce Investment Act, maintain the program’s employer-driven focus. Other priorities for the reauthorization include increased funding for demand-driven training; increased flexibility for local Workforce Investment Boards to set local targets for individuals served; expansion of funding opportunities for on-the-job training (OJT); funding for employer outreach regarding services; and greater flexibility to provide training to up-skill incumbent workers.

Transportation & Infrastructure
Continue to provide states with the flexibility needed to address their unique transportation and infrastructure needs through a coordinated local- and state-based decision-making process. Support federal policies that increase surface transportation funding for metropolitan regions. Encourage policies that support local bodies in using federal funding for pedestrian and transit programs.

Workforce Investment Act
Support the reauthorization of the Workforce Investment Act, maintain the program’s employer-driven focus. Other priorities for the reauthorization include increased funding for demand-driven training; increased flexibility for local Workforce Investment Boards to set local targets for individuals served; expansion of funding opportunities for on-the-job training (OJT); funding for employer outreach regarding services; and greater flexibility to provide training to up-skill incumbent workers.

Energy Taxes
Oppose federal efforts to target and impose multi-billion dollar tax increases on America’s domestic energy producers. If successful, efforts to repeal the ability to expense intangible drilling or development costs, percentage depletion, and the Section 199 manufacturer’s deduction, among others, will result in higher energy costs for the American consumer, fewer jobs for the American worker, and less energy production here at home – making us more dependent on foreign sources of energy, not less.

Small Business Health Care Reforms
Support health care reforms at the state and federal level which will enable small businesses to keep health insurance premium costs down and increase the number of insured employees.

Federal Issues
Defense Spending
Oppose significant reductions in defense spending at the federal level through sequestration. Unless a solution is reached, the proposed across-the-board cuts will begin on January 2, 2013, and continue to impact the next 10 years of the federal budget. Consideration of strategic military needs and objectives is vital; and a solution will mitigate the loss of at least 36,000 jobs in Oklahoma related to defense contractors and related industries.

Federal Issues

Education Funding
Preserve existing funding and appropriate additional funds for education at all levels to accomplish: Fully funding proven intervention strategies to eliminate social promotion, to retain and prepare high school students to successfully pass the EOG graduation tests, to lengthen the school year and to support districts’ implementation of the Common Core Standards (curriculum, technology and professional development).

Medicaid Expansion
Oppose any effort to cause Oklahoma to opt out of the 2014 Medicaid expansion under the Affordable Care Act; pursuit of flexible options toward implementation of the ACA should be seriously considered.

OSU Medical Center & OU Wayman Tisdale Clinic
Support fair and adequate funding for the operations of OSU Medical Center and $3 million for the start-up costs for OU Wayman Tisdale Specialty Clinic to ensure the abilities of Tulsa medical schools to provide critical health care and training.

GlaceRay Expressway
Support the building of the GlaceRay Expressway and Bridge through any funding mechanism available in order to expedite this long overdue transportation system; a partnership with the Oklahoma Turnpike Authority, Tulsa County, and the Oklahoma Department of Transportation is strongly encouraged.

Municipal Revenue Diversification
Support legislative action to preserve, expand, and diversify sources of revenue available to municipalities. Key initiatives in this effort include ensuring a level playing field between community retailers and retail internet sellers in the collection of sales taxes, and increasing the state apportionment for municipal roads and bridges.

Federal Issues

Graduate Medical Education Funding
Support continued funding for Graduate Medical Education to ensure continuation and growth of residency programs in Oklahoma and support and leverage new and existing public funding for expansion of community based primary care residency programs through establishment of Teaching Health Center at Oklahoma PQHCs in collaboration with Oklahoma existing medical schools and academic medical centers.

Arkansas River
Support efforts to expedite the implementation of the Arkansas River Corridor Project for river infrastructure improvements. Allow federal match credit be accrued for state and local expenditures in order to advance construction activity while preserving the Tulsa region’s access to future federal funding for this federally-authorized project.

Marketplace Fairness Act
Support fair and equal treatment of local businesses through passage of the Main Street/Marketplace Fairness Act, allowing collection of sales tax from online sales and preventing the further erosion of our local merchants’ competitiveness. Without this Act, Oklahoma retailers will continue to operate at a competitive disadvantage versus out-of-state online retailers who refuse to collect sales taxes on sales made within Oklahoma.

McClellan-Kerr Arkansas River Navigation System
Support necessary Congressional appropriations to dredge the McClellan-Kerr Arkansas River Navigation System from 9 feet to its Congressionally-authorized 12 feet as originally intended; and to cover the System’s approximate $95 million in critical maintenance backlog.

Federal Rulemaking Authority
Support the reauthorization of the Workforce Investment Act, maintain the program’s employer-driven focus. Other priorities for the reauthorization include increased funding for demand-driven training; increased flexibility for local Workforce Investment Boards to set local targets for individuals served; expansion of funding opportunities for on-the-job training (OJT); funding for employer outreach regarding services; and greater flexibility to provide training to up-skill incumbent workers.

Energy Taxes
Oppose federal efforts to target and impose multi-billion dollar tax increases on America’s domestic energy producers. If successful, efforts to repeal the ability to expense intangible drilling or development costs, percentage depletion, and the Section 199 manufacturer’s deduction, among others, will result in higher energy costs for the American consumer, fewer jobs for the American worker, and less energy production here at home – making us more dependent on foreign sources of energy, not less.

Small Business Health Care Reforms
Support health care reforms at the state and federal level which will enable small businesses to keep health insurance premium costs down and increase the number of insured employees.

Transportation & Infrastructure
Continue to provide states with the flexibility needed to address their unique transportation and infrastructure needs through a coordinated local- and state-based decision-making process. Support federal policies that increase surface transportation funding for metropolitan regions. Encourage policies that support local bodies in using federal funding for pedestrian and transit programs.

Workforce Investment Act
Support the reauthorization of the Workforce Investment Act, maintain the program’s employer-driven focus. Other priorities for the reauthorization include increased funding for demand-driven training; increased flexibility for local Workforce Investment Boards to set local targets for individuals served; expansion of funding opportunities for on-the-job training (OJT); funding for employer outreach regarding services; and greater flexibility to provide training to up-skill incumbent workers.
Tulsa Regional Chamber | Priorities for 2013

STATE

OKPOP Museum
Support a state bond issue for capital investment in the Oklahoma Historical Society’s planned Oklahoma Museum of Popular Culture to maximize private monetary and land donations.

Education Innovation Grants
Support efforts to promote efficient education innovation through initiatives like the Oklahoma School Performance and Innovation Grant Program.

Quality Events Act modifications
Support amending the Oklahoma Quality Events Incentive Act to allow Oklahoma’s communities to attract high-quality, high-impact events in an increasingly competitive regional, national and international market.

Tax Credits and Economic Incentives
Support tax credits, exemptions and incentives that provide an economic return to the state of Oklahoma and maintain our state’s competitiveness in business attraction and retention. Oklahoma’s incentives should be regularly evaluated through a review of what other states offer and their overall impact on citizens of the state, with ineffective incentives being eliminated.

Tulsa Community Supercomputer
Support $2 million in appropriations to the Oklahoma Innovation Institute for the Tulsa Community Supercomputer. This appropriation will help fund the common infrastructure and operations of the supercomputer for the next five years, after which operations of the Tulsa Community Supercomputer will be self-sustaining. This will also enable community-use nodes for state and local governments and entrepreneurs statewide.

Alternative and Traditional Fuels
Support legislative initiatives designed to enhance the market access for alternative and traditional fuels produced in Oklahoma. Our support includes efforts to promote the use of hydraulic fracturing, and the construction of necessary pipeline infrastructure to provide transportation services for this increased production of traditional fuels.

Oklahoma Water Law
Monitor all proposed changes to Oklahoma’s water law. Oklahoma’s existing water law, both stream and ground water, is the result of extensive study and thoughtful consideration and has served the state’s citizens very well. Oklahomans have made significant investments in reliance on the principle that our state’s abundant water supplies are to be beneficially developed, used and enjoyed.

Immigration Reform
Support comprehensive immigration reform at the federal level and oppose further state legislation related to immigration reform. Support federal measures to secure borders, establish reasonable and efficient visa policies and procedures, and comprehensive reform at the federal level that recognizes the need for essential workers so the U.S. can continue to attract the best and brightest talent from around the world.

Passenger Rail
Support efforts to extend passenger rail services from Oklahoma City to Tulsa. Securing the rehabilitation of this corridor for passenger rail is a crucial piece in securing the Tulsa region’s long-term transportation network and community sustainability. Lower cost opportunities should be given significant consideration as we seek to provide this service to the residents of northeastern Oklahoma.
**State Capitol Repairs**
Support the use of state bonds to immediately begin reparations of the Oklahoma Capitol Complex.

**OCAST Funding**
Advocate full funding for programs managed by OCAST (Oklahoma Center for the Advancement of Science and Technology), including the Seed Capital Fund and other programs managed by i2E, to support the creation and growth of small businesses and jobs in Oklahoma.

**Weigh Stations**
Support methods to expedite the immediate construction for the remaining planned weigh stations, by funding the construction costs or debt service with the already allocated one-penny fuel user fee from the Petroleum Storage Tank Indemnity Fund. Investing in our weigh stations now is critical to protecting road and bridge quality from overweight freight traveling through the state, and this method allows for no revenue impact or increased taxes, while using transportation fees to support transportation needs.

**High-Wide Corridors**
Support the establishment of technical advisory group, comprised of appropriate private and public transportation officials, to work with the Oklahoma Department of Transportation to establish unrestricted high wide corridors extending across Oklahoma in each direction to and from the Tulsa Port of Catoosa with minimum width clearances of 35 feet, minimum height clearance of 19 feet, and a maximum weight per piece of 400,000 lbs.

**FEDERAL**

**Immigration**
Support federal measures to secure borders, establish reasonable and efficient visa policies and procedures, and comprehensive reform at the federal level that recognizes the need for essential workers so the U.S. can continue to attract the best and brightest talent from around the world.

**Page Belcher Courthouse**
Support the relocation of the Page Belcher Federal Courthouse. As outlined in the City of Tulsa Downtown Master Plan, the relocation of the Page Belcher building is integral to the continued development of downtown and will provide access to high-value mixed use residential, retail, and hotel to support the adjacent BOK Center and Tulsa Convention Center.

**Multimodal Transportation Facility**
Support development of multi-modal freight transportation facilities including port, airport, rail, and highway access.

**1099 / Independent Contractor piece**
Update and clarify language used by all federal agencies to distinguish between the classification of a worker as an Independent Contractor (Form 1099) versus an Employee (Form W-2), in order to apply the distinction equitably within industries, as well as allow small businesses to understand and properly classify their workforce. Oppose legislative efforts at the state level to define Independent Contractors and Employees.

**Keystone Pipeline**
Support approving the expedited construction and immediate use of the full Keystone XL Pipeline.

**Domestic Energy Production**
Support legislative and regulatory initiatives designed to promote increased production of domestically-produced conventional and alternative fuels, including the protection of enhanced production techniques such as hydraulic fracturing.

**Ozone Attainment Strategies**
Support the development of the OZONE Advance program that gives EPA the regulatory discretion in declaring an area that is taking voluntary measures, both measurable and enforceable, as non-attainment. This will allow Tulsa to maintain its 22-year history of staying in attainment by working together and coming up with innovative solutions to this challenge.

**Earmarks**
Support a return of Congress Constitutionally-mandated budgetary and fiduciary oversight responsibility by permitting the direct allocation of funds for specific projects.

**National Deficit**
Support a balanced plan to address our national debt and deficit. Addressing these systemic challenges is vital for the financial sustainability and security of our nation’s economy.

**Highway Trust Fund**
Work with Oklahoma’s Congressional delegation and the Oklahoma Department of Transportation to secure a permanent, sustainable funding solution for the Federal Highway Trust Fund.

**Preserve the Tax Structure of Energy Master Limited Partnerships (MLPs):**
Preserve and promote the continuation of Master Limited Partnerships (MLPs) during federal tax reform deliberations. Energy MLPs are key investors in today’s natural resources and energy infrastructure. At a time when the Administration and Congress are struggling to meet the current energy needs of the American economy, any change in policy that will increase costs and reduce the capital available to create jobs and expand vital infrastructure would be detrimental to domestically produced energy. Emerging as a national hub of MLP activity, Tulsa is headquarters to several of the energy industry’s pipeline, oil and gas production, and mining MLPs.
STATE ISSUES

Small Business
Support health care reforms at the state and federal level that will enable small businesses to keep health insurance premium costs down and increase the number of insured employees. Encourage the expansion of programs such as Insure Oklahoma to enable small businesses to access insurance products. Specific suggestions include raising the wage ceiling for program eligibility.

In the event that a constitutional amendment to exempt intangible property from taxation is not passed by voters in November 2012, support continued efforts to permanently resolve the challenges created by the Oklahoma Supreme Court ruling in Southwestern Bell Telephone Co. v. Oklahoma State Board of Equalization through a constitutional amendment. If the BAT remains in place beyond 2012, support continued efforts to permanently resolve the challenges created by the Oklahoma Supreme Court ruling in Southwestern Bell Telephone Co. v. Oklahoma State Board of Equalization through a constitutional amendment.

Support state legislative efforts to enhance the collection of sales tax from online purchases, and encourage the Oklahoma Tax Commission to develop and utilize software, which would simplify the reporting process for small businesses. Without legislative action, Oklahoma retailers will continue to operate at a competitive disadvantage versus out-of-state online retailers who refuse to collect sales taxes on sales made within Oklahoma.

Business Retention & Expansion
Support $2 million in appropriations to the Oklahoma Innovation Institute for the Tulsa Community Supercomputer. This appropriation will help fund the common infrastructure and operations of the supercomputer for the next five years, after which operations of the Tulsa Community Supercomputer will be self-sustaining. This will also enable community-use nodes for state and local governments and entrepreneurs statewide.

Transportation
Defend all existing road funding; prevent any diversion of monies; and support increased funding for transportation by developing an adequate, comprehensive funding strategy to broaden the sources of funds and increase the total amount going to transportation statewide. Support moving the remaining 25 percent of motor vehicle fees, which currently go into the state general revenue fund, to transportation priority areas that may include state highways, city and county streets, and public transit.

Energy & Environment
Encourage the increased use of compressed natural gas as a motor fuel by supporting the construction and operation of privately-owned CNG and LNG fueling stations, and increasing public awareness of CNG and LNG availability through establishing alternative fueling station highway signs, public service announcements, and maps to promote these fueling stations. Taking steps to encourage the greater use of CNG and LNG will be an economic driver for our region, and help Oklahoma meet the goals for energy independence established in HB 3023. Support tax credits, exemptions and incentives that provide an economic return to the state of Oklahoma and maintain our state’s competitiveness in business attraction and retention. Oklahoma’s incentives should be regularly evaluated through a review of what other states offer and their overall impact on citizens of the state, with ineffective incentives being eliminated.

Monitor all proposed changes to Oklahoma’s water law. Oklahoma’s existing water law, both stream and ground water, is the result of extensive study and thoughtful consideration and has served the State’s citizens very well. Oklahomans have made significant investments in reliance on the principle that our State’s abundant water supplies are to be beneficially developed, used and enjoyed.

Education
Fund education innovation and effectiveness through grants to local districts for pilot programs that test creative approaches to providing a 21st century education.

Regional Tourism
Support a state bond issue for capital investment in the Oklahoma Historical Society’s planned Oklahoma Museum of Popular Culture to maximize private monetary and land donations.

Support amending the Oklahoma Quality Events Incentive Act to allow Oklahoma’s communities to attract high-quality, high-impact events in an increasingly competitive regional, national and international market.

Labor & HR
Amend Oklahoma statutes to allow employers to obtain temporary restraining orders and injunctions against individuals who pose a credible threat of violence to the employer, employees or others on the employer’s business premises. These changes will address the increasing problem of workplace violence by preventing such people from entering the premises or from harassing, approaching, or contacting persons on the premises.

Support reforms to the police and fire pension systems to ensure the long-term viability of the plans.
FEDERAL

Small Business
Update and clarify language used by all federal agencies to distinguish between the classification of a worker as an Independent Contractor (Form 1099) versus an Employee (Form W-2), in order to apply the distinction equitably within industries, as well as allow small businesses to understand and properly classify their workforce.

Health Care
Secure additional federal funding to encourage expansion of tuition reimbursement and loan deferral programs to expand the health care workforce.

Organize a Tulsa regional wellness and prevention program and maximize funding for this regional initiative.

Regional Tourism
Support the development of passenger rail between Tulsa and Oklahoma City, including both high-speed and conventional service. Establishing rail service between Oklahoma’s two main cities will greatly enhance connectivity throughout the region and serve as an economic catalyst providing greater access to tourist attractions and destinations.

Support the relocation of the Page Belcher Federal Courthouse. As outlined in the City of Tulsa Downtown Master Plan, the relocation of the Page Belcher building is integral to the continued development of downtown and will provide access to high-value mixed use residential, retail, and hotel to support the adjacent BOK Center and Tulsa Convention Center.

Labor & HR
Update and clarify language used by all federal agencies to distinguish between the classification of a worker as an Independent Contractor (Form 1099) versus an Employee (Form W-2), in order to apply the distinction equitably within industries, as well as allow small businesses to understand and properly classify their workforce. Oppose legislative efforts at the state level to define Independent Contractors and Employees.

Support federal measures to secure borders, establish reasonable and efficient visa policies and procedures, and comprehensive reform at the federal level that recognizes the need for essential workers so the U.S. can continue to attract the best and brightest talent from around the world.

Transportation
Support development of multi-modal freight transportation facilities including port, airport, rail and highway access.

Energy & Environment
Support legislation to prohibit the EPA’s misguided regulation of Greenhouse Gases (GHGs) under the Clean Air Act. The Clean Air Act was designed to protect citizens from pollutants that pose dangers to human health. It was not designed to control GHG emissions, and is poorly suited for that purpose. EPA’s effort to regulate GHGs in the U.S. will not result in any meaningful reduction of worldwide GHG emissions, however, the regulations pose serious economic, employment and energy market impacts.

STATE ISSUES

Development, Economy & Taxes

Income Tax
The Chambers appreciate the efforts by Gov. Fallin and the state legislature to review and streamline Oklahoma’s tax system. The Chambers strongly believe that all efforts to alter Oklahoma’s current tax rates and structure should maintain revenue neutrality for core areas of state government, avoid using multi-year tax reduction formulas, exclude highly-volatile revenue sources in growth calculations, and prevent shifting the burden of generating or collecting future tax revenues onto Oklahoma’s businesses.

Workers’ Compensation Reform
With Oklahoma’s workers’ compensation insurance rates continuing to escalate and claim costs continuing to be higher than the national average, significant reforms to the state’s workers’ compensation laws must be enacted. The Chambers will support all changes necessary to make Oklahoma economically competitive in this area.

Economic Development Incentives/Tax Credits
The Chambers support the continued implementation of effective economic development incentives as a means of maintaining Oklahoma’s competitiveness with surrounding states, and to continue attracting high-quality jobs for our citizens. In particular, we support the Quality Jobs Program (QJP); the 21st Century QJP; the Qualified Rehabilitation Expenditures for Historic Buildings incentive; the Investment/ New Jobs Tax Credit; and the Aerospace Engineering Tax Credit.

Quality Events Act
The Chambers support strengthening the Oklahoma Quality Events Incentive Act to allow Oklahoma’s communities to attract high-quality, high-impact events in an increasingly competitive regional, national and international market.

Nexus/Internet Sales Tax Legislation
The Chambers support legislation to require retailers with a physical presence in Oklahoma to collect and remit sales tax on Internet sales.

OCAST
The Chambers advocate full funding for programs managed by OCAST, including the Seed Capital Fund and other programs managed by O2E to support the creation and growth of small businesses and jobs in Oklahoma.

Lawsuit Reform
The Chambers support additional lawsuit reform in Oklahoma, including legislation to:

- Absolve businesses from liability when providing products or services in emergencies.
- Place “lawsuit lenders” under the UCC Consumer Credit Code or state usury laws.
- Adopt the “Transparency in Private Attorney Contracting Act” to establish policies and limits on the use of private contingency fee attorneys on behalf of the state.

Immigration
The Chambers oppose illegal immigration. We support an improved immigration process that promotes the ability of students and workers to enter the United States lawfully and allows employers to accurately verify the status of employees through a federal database. The Chambers believe that immigration policy should be set by the federal government and support comprehensive immigration reform at that level that recognizes the need for essential workers so the U.S. can continue to attract the best and brightest talent from around the world.

Pension Reform
The Chambers support legislative reform efforts designed to strengthen the long-term financial condition of the state’s pension plans.

Liquor Laws
The Chambers will work with all significant stakeholders to examine the benefits and consequences of updating the state’s liquor laws.
The chambers support efforts by Oklahoma’s leaders to medicaid expansion. Healthcare programs that test creative approaches in providing a 21st century education. The chambers support the creation of more charter schools and enabling successful charter schools to grow.

Health Insurance Network
The Chambers support the creation of an Oklahoma-led and private sector-based health insurance network that will provide a marketplace for Oklahomans and serve to prevent the imposition of burdensome federal mandates upon the state of Oklahoma required under the current federal health care law.

Mandates
The Chambers oppose new health insurance mandates and liabilities that will undermine an employer’s ability to provide quality health insurance at a reasonable cost to employees.

Transportation & Infrastructure
ODOT Eight-Year Plan
The Chambers support annual appropriations necessary to preserve and implement ODOT’s eight-year construction work plan.

Governor’s Bridge Improvement and Turnpike Modernization Plan
The Chambers support providing adequate annual state appropriations to implement Gov. Fallin’s Bridge Improvement and Turnpike Modernization Plan to repair or replace all of Oklahoma’s structurally deficient and functionally obsolete bridges by 2019 and to complete the expansion of the Kilpatrick and Creek Turnpikes.

Ports of Entry
The Chambers support providing adequate annual state appropriations and staffing levels for the expedited completion and effective use of weigh stations at Oklahoma’s ports of entry, ensuring the protection of roads and bridges from unnecessary damage caused by overweight freight loads.

Bond to Repair State Capitol
The Chambers support the use of state bonds to immediately begin repairs of the Oklahoma Capitol Complex.

FEDERAL ISSUES

Defense Sequestration
The Chambers will oppose significant reductions in federal spending through sequestration, and support a balanced approach to reducing our national deficit.

Marketplace Fairness Act
The Chambers support fair and equal treatment of local businesses through passage of the Main Street/Marketplace Fairness Act which would allow collection of sales tax from online sales and provide a level playing field for brick and mortar retailers.

Federal Highway Trust Fund
The Chambers will work with our Congressional delegation, the US Department of Transportation, and the Oklahoma Department of Transportation to secure a permanent funding solution for the Federal Highway Trust Fund (including Mass Transit Programs).

Support Restricting Federal Rulemaking Authority
The Chambers believe federal agencies, particularly the EPA, are issuing significant regulations at an accelerated rate without adequately measuring effects on American workers and consumers. Therefore, the Chambers will support and encourage members of Congress to restrict federal rulemaking authority by requiring a comprehensive and cumulative analysis of the total economic impact of rules, including the effect on jobs, electricity rates and reliability, gasoline-prices, energy-intensive manufacturing, small businesses, power plant closures, agriculture, and state and local governments.

MAP-21 (Long-Term Surface Transportation Reauthorization)
The Chambers support full funding for the current MAP-21 Transportation bill. The Chambers further support reauthorization of a multi-year Surface Transportation Act before the current two-year MAP-21 bill expires.

Because HB 1381 (the SHOOP Act) expires in 2014, the Chambers support a long-term solution to fund the state’s Medicaid program through full reimbursement funding for Medicaid services provided by hospitals to the federal upper payment limit (UPL). The Chambers further support setting the Medicaid reimbursement rate for physicians at no less than 100 percent of Medicare rates.

Physician Shortage
The Chambers support incentives to recruit and retain Primary Care Physicians and Allied Health Professionals in Oklahoma, especially in rural and underserved areas, through expansion of residency programs in the state’s Federally-Qualified Health Centers (FQHC), medical schools, scholarships, loan forgiveness and other incentives. The Chambers further support efforts to identify new funding streams dedicated to this initiative.

Because HB 1381 (the SHOOP Act) expires in 2014, the Chambers support a long-term solution to fund the state’s Medicaid program through full reimbursement funding for Medicaid services provided by hospitals to the federal upper payment limit (UPL). The Chambers further support setting the Medicaid reimbursement rate for physicians at no less than 100 percent of Medicare rates.
